MAIL DATE		DELIVERY MODE		
04/30/2007		PAPER		

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No.	Applicant(s)
	10/658,142	FRANK, ED H.
	Examiner	Art Unit
	Jung Park	2616

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

1) Responsive to communication(s) filed on _____.
2a) This action is **FINAL**. 2b) This action is non-final.
3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

4) Claim(s) 1-32 is/are pending in the application.
4a) Of the above claim(s) _____ is/are withdrawn from consideration.
5) Claim(s) _____ is/are allowed.
6) Claim(s) 1-32 is/are rejected.
7) Claim(s) _____ is/are objected to.
8) Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

9) The specification is objected to by the Examiner.

10) The drawing(s) filed on _____ is/are: a) accepted or b) objected to by the Examiner.

Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).

Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).

11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
a) All b) Some * c) None of:
1. Certified copies of the priority documents have been received.
2. Certified copies of the priority documents have been received in Application No. _____.
3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

1) Notice of References Cited (PTO-892)
2) Notice of Draftsperson's Patent Drawing Review (PTO-948)
3) Information Disclosure Statement(s) (PTO/SB/08)
Paper No(s)/Mail Date _____
4) Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____
5) Notice of Informal Patent Application
6) Other: _____

DETAILED ACTION

Claim Objections

1. Claim 26 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form.
 - a. In claim 26, the Examiner suggests changing "5" to --25--.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-9, 11-19, 21-29, 31, and 32 are rejected under 35 U.S.C. 102(b) as being anticipated by Wang et al. (US 5875185, "Wang").

Regarding claims 1 and 21, Wang discloses a method [and a system] for providing location based configuration in a hybrid wired/wireless network, the method comprising:

- identifying a location (using location message, see 104-108 fig.9A) of a network device (one of MT, BS, & Switch, see fig.4) within the hybrid wired/wireless network (as shown in fig.4);
- determining configuration information (connecting message, see 104 fig.9A) corresponding to the determined location of the network device (new BS, see 104 fig.9A); and

- communicating the determined configuration information to the networking device (communication between old BS and Switch, see 106 fig.9A) for providing location based configuration of the network device (106 fig.9A):

Regarding claim 2, Wang disclose, "wherein the network device is selected from the group consisting of an access device (Mobile Terminal, see 64 fig.4), an access point (BS, see 60a-b fig.2) and a switching device (switch, see 54 fig.4)."

Regarding claim 3, Wang discloses, "further comprising discovering configuration information from at least one of a database, and a memory associated with at least one of the access point and the switching device (databases, see fig.8A and 108 fig.9A)."

Regarding claim 4, Wang discloses, "wherein the discovering further comprises scanning the database and the memory by the access device, access point and switching device to discover the configuration information (scanning for comparison, see 108 fig.9A)."

Regarding claim 5, Wang disclose, "wherein the determining further comprises scanning at least one RF channel by at least one of the access point and the access device to discover the configuration information (wireless transmission, see col.2, ln.1-6)."

Regarding claim 6, Wang lacks what Bridgelall discloses, "wherein the RF channel is at least one of a broadcast channel and a setup channel (col.2, ln.1-6)."

Regarding claim 7, Wang discloses, "further comprising updating the network device with the communicated configuration information (116 fig.9B)."

Regarding claim 8, Wang discloses, "further comprising dynamically updating the network device with the communicated information whenever it is determined that at least one network setting corresponding to a location of the network device has changed (seamless handoff as described in 9A-B)."

Regarding claim 9, Wang discloses, "wherein the determined information is at least one of bandwidth etiquette and sharing rules, channel availability, preferred channel, and available communication protocols (114 fig.9B)."

Regarding claim 11, it is a claim corresponding to claim 1, except the limitation of "a computer-readable medium (a program for implementing flow charts, 9A-B) and is therefore rejected for the similar reasons set forth in the rejection of claim 1.

Regarding claims 12-19, they are claims corresponding to claims, 2-9, respectively and are therefore rejected for the similar reasons set forth in the rejection of the claims.

Regarding claims 22-29, they are claims corresponding to claims, 2-9, respectively and are therefore rejected for the similar reasons set forth in the rejection of the claims.

Regarding claim 31, Wang discloses, "further comprising at least one querying agent for querying a network device for location information (not shown agent for controlling databases, see fig.8B)."

Regarding claim 32, Wang discloses, "further comprising at least one informing agent for informing at least one of the access point, access device and switching device of at least one network parameter related to location based configuration (not shown agent for informing location, see the flow chart of fig.9A)."

4. Claims 10, 20, and 30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wang in view of Augart (US 7200673, "Augart").

Regarding claims 10, 20, and 30, Wang discloses, "triangulating locations of network routing devices named in the received routing information to determine the location of the network device (as shown in fig.4)", but lacks what Augart discloses, "wherein the determining further comprises: sending a ping message (a probe packet, see 150 fig.2 and col.4, ln.56-67) to at least one network routing device; receiving routing information associated with the ping message (TTL values, see col.4, ln.56-67)." Therefore, it would have been obvious to one of ordinary skill in the art at the time of applicant's invention to apply the probe packet taught by Augart into the hybrid network of Wang in order to determine a geographical location of a network device on a network.

Conclusion

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jung Park whose telephone number is 571-272-8565. The examiner can normally be reached on Mon-Fri during 6:15-3:45.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Chau Nguyen can be reached on 571-272-3126. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
